Energy Economics

Index to Volume 3
January, April, July, October 1981

Articles – titles

National and world energy models

A comparative analysis of global energy models. *E. L. Allen, J. A. Edmonds* and *R. E. Kuenne*. 3.1, 2–13

Depletion policy and the de-industrialization of the UK economy. *T. Barker*. 3.2, 71–82

The energy–GDP relationship in developing countries: empirical evidence and stability tests. *B. Zilberfarb* and *F. G. Adams*. 3.4, 244–248

Energy policy formulation for Pakistan: an optimization approach. *T. Riaz*. 3.3, 191–197

Implied elasticities in some UK energy projections. *M. S. Common*. 3.3, 153–158

An input–output analysis of Australian energy planning issues. *N. D. Karunaratne*. 3.3, 159–168

The role of investment for energy conservation: future Japanese economic growth. *K. Suzuki* and *H. Takenaka*. 3.4, 233–243

Exhaustible resource markets

Depletion policy and the de-industrialization of the UK economy. *T. Barker*. 3.2, 71–82

Exhaustible resource models and predictions of crude oil prices – some preliminary results. *K. Pakravan*. 3.3, 169–177

Exploration decisions and firms in the mineral industries. *E. D. Attanasi*. 3.2, 105–112

Models of resource markets and the explanation of resource price behaviour. *R. S. Pindyck*. 3.3, 130–139

Energy demand and energy efficiency

Elasticities – science or fiction? *G. Kouris*. 3.2, 66–70

Energy consumption and economic activity in industrialized countries: the dynamic aggregate time series relationship. *M. Beenstock* and *P. Willcocks*. 3.4, 225–232

Energy efficiency and the slump in labour productivity in the USA. *E. F. Renshaw*. 3.1, 36–42

Energy expenditure in sectors of manufacturing. *J. S. Wabe*. 3.3, 178–181

Implied elasticities in some UK energy projections. *M. S. Common*. 3.3, 153–158

Inverted block or lifeline rates and micro-efficiency in the consumption of electricity. *J. L. Neufeld* and *J. M. Watts*. 3.2, 113–121

Optimal electricity supply: reliability, pricing and system planning. *M. Munasinghe*. 3.3, 140–152

Residential demand for electricity. *J. Wills*. 3.4, 249–255

Energy and the environment

On the economics of pollution control for sulphur dioxide emissions. *N. H. Highton* and *M. G. Webb*. 3.2, 83–90

Electricity supply and demand

An econometric analysis of peak electricity demand in the short run. *R. R. Betancourt*. 3.1, 14–29

Inverted block or lifeline rates and micro-efficiency in the consumption of electricity. *J. L. Neufeld* and *J. M. Watts*. 3.2, 113–121

Marginal generating costs of multi-block power systems with and without partial outages. *D. Feiler* and *J. Zahavi*. 3.2, 91–101

Optimal electricity supply: reliability, pricing and system planning. *M. Munasinghe*. 3.3, 140–152

A proposal for peak load pricing of public utilities. *Y. C. Peles*. 3.3, 187–190

Residential demand for electricity. *J. Wills*. 3.4, 249–255

The welfare economics of optional seasonal time-of-day electricity tariffs. *J. T. Wenders*. 3.2, 102–104

Oil supply and demand

Bidding for petroleum leases: recent Canadian experience. *G. C. Watkins* and *R. Kirkby*. 3.3, 182–186

Canadian oil exports to the USA: from profusion to parsimony. *G. C. Watkins*. 3.4, 219–224

Depletion policy and the de-industrialization of the UK economy. *T. Barker*. 3.2, 71–82

Exhaustible resource models and predictions of crude oil prices – some preliminary results. *K. Pakravan*. 3.3, 169–177

Petroleum decline analysis using time series. *R. K. Mueller, D. J. Eggert* and *H. S. Swanson*. 3.4, 256–267

Stability of US petroleum refinery response to relative product prices. *C. Dahl* and *G. S. Laumas*. 3.1, 30–35

Vertical divestiture of the US oil industry and US-OPEC relations. *H. Steele* and *G. Daly*. 3.1, 43–56

Economics of nuclear power

The economics of nuclear fuel reprocessing: a case study of the Windscale THORP plant. *P. Jones* and *D. Pearce*. 3.4, 202–218

Book reviews

An Analysis of the Low Energy Strategy: As Proposed by the International Institute for Environment and Development by G. V. Day, H. H. Inston and F. K. Main (M. S. Common). 3.4, 269
Energy and Environment in Inter-regional Input–Output Models by Frederik Muller (William Peterson). 3.2, 122–123
Europe and World Energy by Hanns Maull (Guy de Carmoy). 3.3, 198

Rejoinder

Global energy models: a comment. R. A. Irving.
Reply. E. L. Allen, J. A. Edmonds and R. E. Kuenne. 3.4, 268–269

Postscript

Energy elasticities and energy ratios. L. G. Brookes. 3.2, 122

Recent papers

3.1, 57–58; 3.2, 123–125; 3.3, 198–199; 3.4, 270–271

Publications

3.1, 59–61; 3.2, 126; 3.3, 200; 3.4, 271–272

Conferences
